## BENEFITS

- Improves equipment life and performance by removing at least 90%+ of all dissolved solids that cause scale build-up
- Protects against taste and odor causing contaminants while removing dirt, particulates and dissolved minerals
- Less frequent deliming of equipment means reduced maintenance and service costs
- Sanitary cartridge replacement is simple, quick and clean. Internal filter parts are never exposed to handling or contamination
- Wall mount design allows flexible installation
- Reduces chlorine taste and odor and other offensive contaminants that can adversely affect taste of water and beverages
- Reduces limescale build-up that can cause excessive machine downtime and increased maintenance costs. Plus, scale reduction reduces energy costs

## INSTALLATION TIPS

- Choose a mounting location suitable to support the full weight of the system when operating
- Deliming of equipment prior to application is recommended
- Never use saddle valve for connection
- Use 3/8" (min.) water line
- The water inlet must supply a minimum of 0.5 gpm
- Install vertically with cartridge hanging down and allow 2 inches above and below unit for cover removal and service access.
- Allow clearance to right of unit for optional pre-filter
- Refer to Installation, Operation & Maintenance Manual for cartridge flushing and RO start-up

## OPERATION TIPS

- Change filter cartridges on a regular 6 month preventative maintenance program
- Change RO cartridges on a regular 2 year preventative maintenance program
- Change cartridges when capacity is reached
- Always flush the filter cartridge at time of installation and cartridge change

## APPLICATION/SIZING

- Mineral Reduction System for foodservice applications
- Ideal for: Flash steamers, conventional steamers, cheese melters, combi-ovens and coffee/espresso machines
- Output capacity dependant on membrane selected:
  - 100 gallons per day (379 lpd)
  - 225 gallons per day (852 lpd)
- For use in coffee, steam, reconstitution, ice and multiple applications.
